

# CALCULUS I

## *Course Evaluation*

1. Lecture attendance and exercise attendance are mandatory. Only **three**\* absences are allowed in the term. If the student **exceeds** the allowable number of absences is going to be automatically deleted from the course with the final mark **2.0** (exercises+lectures/course). \*including at most one without medical justification
2. There are two midterm tests. Each test consists of four problems. The value of each problem is 5 points.
3. Bonus points (max 6 points): additional quizzes and involvement.
4. Grading scale: 0-20 (**2**); 20.5-24 (**3.0**); 24.5-28 (**3.5**); 28.5-32 (**4.0**); 32.5-36 (**4.5**); 36.5-45 (**5.0**). The mark above **3.0** is a passing mark (exercises) which cannot be appealed. This is also a passing mark from the course.
5. A student who gets **2.0** from exercises must write an exam (6 problems, the value of each problem is 5 points). Grading scale: 0-15 (**2**); 15.5-18 (**3.0**); 18.5-21 (**3.5**); 21.5-24 (**4.0**); 24.5-27 (**4.5**); 27.5-~~45~~ 34 (**5.0**). (20% of points from the midterms are added to the score.)
6. During the tests and exams every student should provide the proof of identity.
7. Cheating during tests and exams ends up with the final mark **2.0** from the whole course and cannot be appealed.
