

Preface	
1 Main concepts	
1.1 Elements of the theory of relations	1
1.2 Functions and operations	6
1.3 Algebraic systems	9
1.4 Closure operations	12
1.5 Notes on Chapter 1	22
Menger algebras of functions	
2.1 Definitions and fundamental notions	23
2.2 Menger semigroups	39
2.3 v -regular Menger algebras	45
2.4 i -solvable Menger algebras	55
2.5 Group-like Menger algebras	62
2.6 Antisymmetric Menger algebras	74
2.7 Representations of Menger algebras	83
2.8 Notes on Chapter 2	90
Ordered Menger algebras	
3.1 Menger algebras of relations	93
3.2 F.o. and p.q-o. Menger algebras	99
3.3 Algebras of reversion functions	105
3.4 (λ) -, (γ) -, (λ, γ) -Menger algebras	113
3.5 Restrictive Menger algebras	131
3.6 Functional Menger systems	140
3.7 Notes on Chapter 3	148
Relations between functions	
4.1 Stabilizers of Menger algebras	151
4.2 Stabilizers of functional Menger systems	167
4.3 Stationary subsets	179
4.4 Semi-compatibility relation	199
4.5 Co-definability relation	210
4.6 Connectivity relation	217
4.7 Projection equivalence	224
4.8 Notes on Chapter 4	230
$(2, n)$-semigroups of functions	
5.1 $(2, n)$ -semigroups and their representations	233
5.2 Menger $(2, n)$ -semigroups	253
5.3 Projection relations on $(2, n)$ -semigroups	270
5.4 Notes on Chapter 5	295
Systems of multiplace functions	
6.1 Menger systems	297
6.2 Menger T -systems	312
6.3 Positional algebras	320
6.4 Mal'cev-Post iterative algebras	332
6.5 Semigroups of functions	355
6.6 Central semigroups of operations	363
6.7 Algebras of vector-valued functions	367
6.8 Notes on Chapter 6	377
Bibliography (251 items)	379
Designations	397
Index	401
