Papers by Alexei M. Kulik (Oleksii M. Kulyk)

[1] Approximation in law of locally α-stable Lévy-type processes by non-linear regressions. Electronic Journal of Probability, 2019, vol. 24, art. 83, 1-45.

[2] On weak uniqueness and distributional properties of a solution to an SDE with α-stable noise, *Stochastic Processes and Applications*, **129** (2019), no. 2, $473 - 506$.

[3] (with I. Pavlyukevich) Limit theorem for non-linear Langevin equations driven by Lévy noise, Annales de l'Institut Henri Poincaré, 2019, vol. 55, no. 3, $1278 - 1315$.

[4] (with M. Scheutzow) Generalized couplings and convergence of transition probabilities, Probability Theory and Related Fields, 2018, Vol. 171, 333-376.

[5] (with V. Knopova) Parametrix construction of the transition probability density of the solution to an SDE driven by α-stable noise, Annales de l'Institut Henri Poincaré, 2018, Vol. 54, No. 1, 100-140

[6] (with V. Knopova) Intrinsic compound kernel estimates for the transition probability density of a Lévy type processes and their applications, Probability and Math. Stat.-Poland, Vol. 37, No. 1 (2017), 53 - 100

[7] *Markov models: stabilization and limit theorems*, $81 - 121$, in *S. Roelly, M. Rafler (Eds), Stochastic processes with applications in the natural sciences*, Potsdam University Press, 2017, ISSN: 2199-4951.

[8] (with V.P. Knopova) Intrinsic compound kernel estimates for the transition probability density of a Lévy type processes and their applications, Probability and Math. Stat.-Poland, Vol. 37, No. 1 (2017), $53 - 100$.

[9] (with P. Cattiaux, M. Fradon, and S. Roelly) Long time behavior of stochastic hard ball systems, Bernoulli 22, No. 2 (2016), $681 - 710$.

[10] (with J.Gairing, M.Hoegele, and T.Kosenkova) On the calibration of Lévy driven time series with coupling distances with an application in paleoclimate, in Springer-INdAM Series vol. 15 "Mathematical Paradigms of Climate Sciences" (2016), Springer, Milan, Heidelberg, ISBN 978-3-319-39091-8.

[11] (with D. Soboleva) Large deviation principle for one-dimensional SDEs with discontinuous coefficients, Modern Stochastics: Theory and Applications, 5, No.2 (2016), 145 - 164.

[12] (with D. Soboleva) Asymptotics of exponential moments of a weighted local time of a Brownian motion with small variance, Modern Stochastics: Theory and Applications, 5, No.2 (2016), 95 - 103.

[13] (with D. Ivanenko and H.Masuda) Uniform LAN property of locally stable Lévy process observed at high frequency, ALEA, Lat. Am. J. Probab. Math. Stat. 12, (2015), 835 - 862.

[14] (with I. Ganychenko, and V. Knopova) Accuracy of discrete approximation for integral functionals of Markov processes, Modern Stochastics: Theory and Applications, 4, No. 4 (2015), 401 - 420.

[15] (with M.Scheutzow) A coupling approach to Doob's theorem, Rendiconti Lincei Mat. Appl. 26, No. 1 (2015), $83 - 92$.

[16] (with J.Gairing, M.Hoegele, and T.Kosenkova) Coupling distances between Lévy measures and applications to noise sensitivity of SDE, Stochastics and Dynamics, 15, No. 02, (2015), 1550009.

[17] (with Iu. Ganychenko) Weak approximation rates for integral functionals of Markov processes, Modern Stochastics: Theory and Applications, 2, No. 3 (2015), $251 - 266$.

[18] (with V.P.Knopova) Parametrix construction for certain Lévy-type processes, Random Operators and Stochastic Equations, 23, No. 2 (2015), $111 - 136$.

[19] (with D.O.Ivanenko) LAN property for discretely observed solutions to Lévy driven SDE's,

Modern Stochastics: Theory and Applications, 1, No. 1 (2014), 33 – 47.

[20] (with V.P.Knopova) Asymptotic behaviour of the distribution density of the fractional Lévy motion. Proceedings of the MSTA-3 Conference volume, Modern Stochastics and Applications, Springer series: Optimization and Its Applications, Vol. 90, pp. 175 - 201, 2014.

[21] (with Iu. Ganychenko) Rates of approximation of non-smooth integral type functionals of Markov processes, Modern Stochastics: Theory and Applications, 1 No. 2 (2014), 117– 126.

[22] (with T.I.Kosenkova) Transportation distance between the Lévy measures and stochastic equations for Lévy-type processes, Modern Stochastics: Theory and Applications, 1, No. 1 (2014), 49 – 64.

[23] (with N.N.Leonenko) Ergodicity and mixing bounds for the Fisher-Snedecor diffusion, Bernoulli 19(5B) (2013), 2294 – 2329.

[24] (with V.P.Knopova) Intrinsic small time estimates for distribution densities of Lévy processes, Random Operators and Stochastic Equations, 21, No. 4 (2013), 321 – 344.

[25] (with D.O.Ivanenko) Malliavin Calculus Approach to Statistical Inference for Lévy Driven SDEs, Methodology and Computing in Applied Probability, 17 No. 1, (2013), 107 – 123.

[26] (with T.D.Tymoshkevych) Lift zonoid order and functional inequalities, Teor. Imovir. Mat. Stat. 89 (2013), 75– 90; translation in Theory Probab. Math. Statist.

[27] (with T.D.Tymoshkevych) Lift zonoid and barycentric representation on a Banach space with a cylinder measure, Lithuanian Mathematical Journal, 53, No. 2, (2013), 181 - 195.

[28] (with A.Yu.Veretennikov) Diffusion approximation for systems with weakly ergodic Markov perturbations I. Teor. Imovir. Mat. Stat. 87 (2012), 1 - 16; translation in Theory Probab. Math. Statist.

[29] (with A.Yu.Veretennikov) Diffusion approximation for systems with weakly ergodic Markov perturbations II. 88 (2013), 1 - 16; ; translation in Theory Probab. Math. Statist.

[30] (with A.Yu.Veretennikov) On extended Poisson equation for weakly ergodic Markov processes, Teor. Imovir. Mat. Stat. 85 (2011), 22 – 38; translation in Theory Probab. Math. Statist.

[31] (with S.V.Bodnarchuck) Stochastic control for Lévy driven stochastic processes by time change transformations. Teor. Imovir. Mat. Stat. 86 (2012), 11 - 27; translation in Theory Probab. Math. Statist.

[32] (with D.Soboleva) Large deviations for one-dimensional SDE with discontinuous diffusion coefficient. Theory of Stochastic Processes, 18(34), no. 1 (2012), 101 – 110.

[33] (with X.Chen) Brownian motion and parabolic Anderson model in a renormalized Poisson potential, Annales de l'Institut Henri Poincaré - Probabilites et Statistiques, 48, no. 3 (2012), 631 – 660 p.

[34] (with X.Chen) Asymptotics of negative exponential moments for annealed Brownian motion in a renormalized Poisson potential, International Journal of Stochastic Analysis, 2011 (2011), 43 p.

[35] (with V.Knopova) Exact asymptotics for a distribution density of certain Lévy functionals, Electronic Jour. of Probability, 16 (2011), 1394 – 1433.

[36] Absolute continuity and convergence in variation for distributions of functionals of Poisson point measure, Journal of Theoretical Probability, 24 (2011), 1 – 38.

[37] Asymptotic and spectral properties of exponentially ϕ-ergodic Markov processes, Stochastic Processes and Applications, 121 (2011), 1044 – 1075.

[38] Poincaré inequality and exponential integrability of the hitting times of a Markov process. Theory of Stochastic Processes, 17(33) No. 2 (2011), 71 – 80.

[39] (with S.V.Bodnarchuk) Conditions of smoothness for the distribution density of a solution of a multidimensional linear stochastic differential equation with Lévy noise, Ukrainian Mathematical Journal, 53, No. 4 (2011), 501 - 515.

2006 - 2010

[40] Exponential ergodicity of the solutions to SDEs with a jump noise, Stochastic Processes and Applications, 119 (2009), 602 – 632.

[41] Additive functionals of Markov processes and local times of random processes, Mathematics today, 2009, 39–66.

[42] (with Yu. Mishura and O.Soloveiko) On convergence and differentiability w.r.t. the barrier of the prices of barrier, Teor. Imovir. Mat. Stat. 81 (2009), 102–112; translation in Theory Probab. Math. Statist.

[43] (with S.Bodnarchuk) Conditions for existence and smoothnes of the distribution density for an Ornstein-Uhlenbeck process with a Lévy noise, Teor. Imovir. Mat. Stat. 79 (2009), 20–33; translation in Theory Probab. Math. Statist.

[44] (with Yu.Kartashov) Convergence of difference additive functionals under local conditions on their characteristics, Ukrainian mathematical journal, 61 No. 9 (2009), 1208–1224.

[45] (with Yu.Kartashov) Weak convergence of additive functionals of a sequence of Markov chains, Theory of stochastic processes, 15(31), No 1 (2009), 15–32.

[46] Malliavin calculus for difference approximations of multidimensional diffusions: truncated local limit theorem, Ukrainian mathematical journal, 60, No. 3 (2008)

[47] Difference approximation of local times of multidimensional diffusions, Teor. Imovir. Mat. Stat. 78 (2008), 67–83; translation in Theory Probab. Math. Statist.

[48] A limit theorem for the number of sigh changes for a sequence of one-dimensional diffusions, Theory of stochastic processes, 14(30), No. 2 (2008), 79 – 92.

[49] Local times of random processes, Mathematics today, 2008, 31 - 65.

[50] (with I.Korchinskii) Local limit theorem for triangular array of random variables, Theory of stochastic processes, 13(29), No. 3 (2007), 48 – 54.

[51] Markov approximation of stable processes by random walks, Theory of stochastic processes, 12(28), No. 1-2 (2006), 87–93.

2001 - 2006

[52] On a convergence in variation for distributions of solutions of SDE's with jumps, Random Operators and Stoch. Equations, 13 No. 2 (2005), 297 – 312.

[53] (with T. Androschuk) Limit theorems for oscillatory functionals of a Markov process, Theory of stochastic processes, 11(27), No. 3-4 (2005), 3–13.

[54] On a regularity of distribution for solution of SDE of a jump type with arbitrary Lévy measure of the noise, Ukrainian mathematical journal, 57, No. 9 (2005).

[55] On a convergence in variation for distributions of solutions of SDEs with jumps, Random Operators and Stoch. Equations, 13, No. 2 (2005).

[56] Large deviation estimates for solutions of Fredholm-type equations with small random operator perturbations, Theory of stochastic processes, 11(27), No. 1-2 (2005).

[57] Markov uniqueness and Rademacher theorem for smooth measures on infinite-dimensional space under successful filtration condition, Ukrainian mathematical journal, 57, No. 2 (2005).

[58] Malliavin Calculus for Lévy processes with arbitrary Lévy measures, Teor. Imovir. Mat. Stat. 72 (2005); translation in Theory Probab. Math. Statist.

[59] On a solution of one-dimensional SDE with a singular drift coefficient, Ukrainian mathematical journal, 56, No. 5 (2004).

[60] The optimal couplings and flows of minimal entropy for one-dimensional Markov pro-

cesses, Theory of stochastic processes, 10(26), No. 3-4 (2004).

[61] The optimal coupling property and its applications: limit theorems for non-elliptic diffusions and construction of canonical stochastic flow, Theory of stochastic processes, 9 (26), No. 1-2 (2003).

[62] Log-Sobolev inequality, exponential integrability and large deviation estimates for $C(\alpha, \beta)$ log-concave measures, Random Operators and Stoch. Equations, 10 No. 2 (2002), 105 – 122.

[63] Filtration and finite-dimensional characterization of log-concave measures, Ukrainian mathematical journal,. 54, No. 3 (2002).

[64] Anticipating linear stochastic differential equations by Poisson random measures, Theory of stochastic processes, 8(24), No. 3-4 (2002).

[65] Malliavin calculus for functionals with generalized derivatives and some applications for stable processes, Ukrainian mathematical journal, 54, No. 2 (2002).

[66] Stochastic flows for quasi-diffusion processes, Proceedings of Ukr. Mat. Congr. (Kyiv, 2001) Section 9 (Probability Theory and Math. Stat.), Kyiv, 2001.

[67] Some remarks on time-stretching differentiation for general Lévy processes, Theory of stochastic processes, 7(23), No. 3-4 (2001).

1997 - 2001

[68] Admissible formal differentiations for pure discontinuous Markov processes, Theory of stochastic processes, 6(22), No. 1-2 (2000).

[69] (with A.Yu.Pilipenko) Non-linear transformations of smooth measures on infinitedimensional space, Ukrainian mathematical journal,. 52, No. 9 (2000).

[70] Admissible transformations and Malliavin calculus for compound Poisson process, Theory of stochastic processes, 5(21), No. 3-4 (1999).

[71] Large deviations for smooth measures, Theory of stochastic processes, 4(20), No. 1-2 (1998).

[72] Intergal representation for functionals on a space with a smooth measure, Theory of stochastic processes, 3(19), No. 1-2 (1997).

[73] Regular Gaussian random operators and the Stroock-Varadhan theorem for a symmetric stochastic Fredholm-type equation, Teorija verojatnostei i primenenija, 42, No. 2 (1997), translation in Probability Theory and Appl.

[74] Local properties of solutions of stochastic integral equations, Theory of stochastic processes, 2(18), No. 3-4 (1996).

[75] Non-Gaussian stochastic symmetric integral equations, Theory of stochastic processes, 2(18), No. 3-4 (1996).
